

bandinFo whåZho

2015: First gig lined up, no guitarist and no songs... WhåZho!
Looper? Awesome! Effects? Also awesome! Guitar? No way! Synth? Mega!
Gutfeeling Records? Home base!

There are two of them (but they sound like three):
Philip Groß (drums, samples, glockenspiel, effects, fusion box) and
Christian Riedel (bass, synths, loops & effects)

Fascinated by effect-laden loops and samples with predominantly instrumental songs,
traveling through space and time and across all genres and styles.

Pop glamour comes in the form of visual art by VJ Zava (sometimes) – it's a must!

Gossip: 2024 mainly projects with guest musicians (Patchekos Horns and concerts
with Monobob members), in the 10th anniversary year 2025, be part of Sound of Munich
now 25 and back to the roots in the rehearsal room, tinkering with new tracks - danceable,
with love, noise, and madness. <3
